**In Loving Memory  
of  
PROF.(DR.) ARUN PAUL CHOUDHURY**

---

**(1960 –2023)**

***"The moments may have ended but the memories last forever..."***

*Prof. (Dr.) Arun Paul Choudhury was a man of many virtues. He was an excellent academician, a kind doctor, a loving & caring teacher, but above all a great human being. He was associated with Silchar Medical College for a long time and later was posted as Professor & Head of the Department of Obstetrics & Gynaecology in Dhubri Medical College & Hospital on 24th April, 2022. It was a heart-breaking moment when he breathed his last on 9th January, 2023 in Tata Cancer Hospital, Kolkata. He is left behind by his wife and his two sons... as well as thousands of students and countless well-wishers.*

## Dhubri Medical College: from birth to infancy

**Prof. (Dr) Dharmakanta Kumbhakar**

### **Staff President and Professor & HOD, Pathology**

The establishment of Assam Medical College at Dibrugarh on November 3, 1947 was a landmark event in the history of Medical Education in Northeast India. It was started with the already available infrastructure and staff of Berry White Medical School which was established in 1900. After a long period of 12 years from the establishment of first medical college at Dibrugarh, the Government of Assam felt the need for a second medical college in the year 1959 and the Government established Gauhati medical College as second medical college of the State on September 20, 1960 and subsequently Silchar Medical College as third on August 15, 1968.

It took nearly thirty seven years more to realise the need of more Medical Colleges in the State, and the issue got momentum in the year 2005, when a Society for Medical Education was launched in Assam, under which establishment of three Medical Colleges were planned in Jorhat, Barpeta and Tezpur. Later, Jorhat Medical College was established on October 12, 2009, Fakhruddin Ali Ahmed Medical College at Barpeta on February 11, 2011 and Tezpur Medical College on January 30, 2014. Subsequently the Govt established Diphu Medical College on November 25, 2019 and Lakhimpur Medical College on October 1, 2021.

The need for a medical college and hospital at Dhubri was a long-standing issue for the State Government. The citizen of Dhubri district formed a forum named Dhubri Medical College Demand Committee and submitted memorandum several times to the State Government to establish a medical college at Dhubri town. The issue got momentum when the State Government decided to establish a medical college at Dhubri on the Dhubri Civil Hospital campus under the Centrally sponsored scheme "Establishment of new Medical Colleges attached with existing district referral Hospital" in 2014. *Bhumi Pujan* and foundation stone laying ceremony of the DMCH were done by the then Union health minister JP Nadda in the presence of the then chief minister of Assam Sarbananda Sonowal and health minister Himanta Biswa Sarma on February 17, 2017 in an area of approximately 108 *bighas*.

Construction of college administrative building, 500-bed hospital building along with modern infrastructures and other ancillary facilities progressed during the next five years and were completed in the beginning of the year 2022, following which faculty members, doctors, nurses, office staff, paramedical staff and other employees of DMCH were gradually appointed. Prof (Dr) Shilpi Rani Barman took over as the first Principal cum Chief Supdt of DMCH. After appointment of the faculties, the outpatient services at DMCH were started on June 1, 2022. The indoor services as well as operation services by the faculties of DMCH were started in July 26, 2022 at the

erstwhile Dhubri Civil Hospital and subsequently all services were shifted to the newly constructed hospital building. Meanwhile the completed college building was equipped with establishment of three pre-clinical and five para-clinical departments, various students' library, modern dissection hall for anatomy department, a well-furnished central library, lecture halls with audio-visual equipments, gymnasium and Medical Education Unit. It is really a challenging task to convert the concrete buildings to a medical college which is a temple of medical education and caring home for the ailing community.

The toughest test for the DMCH was the National Medical Commission (NMC) inspection and permission. NMC conducted the first inspection of DMCH on March 22 and 23, 2022 and another subsequent compliance inspection on August 5, 2022. NMC issued Letter of Intent (LOI) on August 8, 2022 and Letter of Permission (LOP) on August 23, 2022 for admission of 100 students in the MBBS course for the session 2022-23.

Thereafter, on October 13, 2022, Hon'ble President of India Smt. Droupadi Murmu formally inaugurated and dedicated Dhubri Medical College & Hospital, the 9<sup>th</sup> state Government medical college to the people of Assam on virtual platform from IIT Guwahati in Presence of Hon'ble Governor of Assam Sri Gulab Chand Kataria, Hon'ble Chief Minister of Assam Dr. Himanta Biswa Sarma and Hon'ble Health Minister of Assam Sjt Keshab Mahanta. It is a matter of great pride and satisfaction for the people of west Assam that the Dhubri Medical College & Hospital has completed one year of its existence on October 13, 2023.

Situated on RK Mission Road, Jhagarpar, Dhubri, about 290 km away from Guwahati, the existence of DMCH has ushered in economic development at Jhagarpar and its surrounding areas and has provided job and business opportunities to the local people.

The journey of academic session of Dhubri Medical College started with 100 MBBS students admitted for the session 2022-23 and the session was formally launched from November 15, 2022. Currently, there are two batches (100 students per batch) pursuing MBBS course at Dhubri Medical College. It is hoped that after few years, DMCH will convert into a postgraduate medical institution and will produce specialist doctors. The college is affiliated to the Srimanta Sankaradeva University of Health Sciences, Assam. *Bor Luitor Parore, Netai Dhuburir Amayapuri*.....written by noted lyricist Kamal Kataki and tuned by Paran Barkataki, is the college anthem which will be released and sung first time by the students and faculties of DMCH in the first college anniversary on October 13, 2023. *Ankuran* is the college magazine.

Excellence in education, research and patient care are the mission of DMCH. To provide State of the Art Medical Education that can be transformed into best healthcare practices to meet the needs of the community, to support and conduct high quality research to bring out the innovations in healthcare and to deliver high quality, patient-centred, advanced care for the sick through the State of the Art hospital facility are the vision of DMCH.

The teaching and non-teaching staff, present principal cum chief superintendent Prof. (Dr) Anku Moni Saikia, hospital administration and the students of DMCH are all dedicated to working for development of the college to achieve the mission and vision of DMCH. The faculties of DMC are providing the best of education as well as environment in the field of sports, literature and cultural activities to the students and best of healthcare services to the patients. As is the case with

all new medical colleges, DMCH is also facing the problem of lack of sufficient faculty and infrastructure. It is seen that most of the faculties of medical colleges of Assam have opted either for voluntary retirement or resignation. To stop this, the government must adopt some policies for the faculties like fair and transparent transfer policy, higher salary, better accommodation, etc. One hopes the government will take the necessary steps in this regard as many more medical colleges are coming up in different districts of Assam and are at various stages of development. Moreover, there is a need to attract fresh minds in medical teaching by offering attractive facilities which will give a great boost to medical teaching in coming days.

The growth of DMCH in its infancy is however marred by several teething troubles. Prominent amongst them are shortages of accommodation for doctors and staff, guest house, safe drinking water, auditorium, recreation facilities, utility building, examination hall complex and play ground. The students of DMC are excellent in academics as well as extracurricular activities.

The DMCH is providing quality healthcare services to the people of several districts of west Assam and parts of West Bengal with modern healthcare facilities. It consists of a 500-bed building with modern equipment, ICU, NICU, operation theatres, emergency operation theatres, laboratory, blood bank, mortuary, paying cabin complex, etc. However, there is no proper external drainage system for the liquid affluent at the DMCH campus. Moreover, there is scarcity of resident doctors at DMCH. Resident doctors are the backbone of a medical college hospital. This problem will be solved partly after four and half years when the first batch of DMCians will be passed out and the issue will be permanently solved after the post graduate courses start in the clinical subjects at DMCH.

There are all together 22 departments under DMCH now. With the increasing flow of patients to the hospital, the need for some super-speciality services like cardiology, nephrology, neurology and neurosurgery are being felt. Because of lack of these super specialists, patients are being referred to higher centres at present. As DMCH is situated close to the national highway and far way from Guwahati, incidents of road traffic accidents are also increasing in our state, establishment of a trauma centre (at DMCH) would be ideal in future. For all these additional facilities at DMCH, the government must provide man power, additional space, infrastructure, costly equipments and more funds in future. With time and necessary financial help from the government, DMCH can become one of the best medical colleges in the country to fulfil the hopes and aspirations of people.
